

[DRAFT] Data Sheet E – Results of Internal Review Committee

Date of Review/Recommendation: November 26, 2010

Water Body Under Evaluation:

Water Body ID #: 0991
Name: South Moreau Creek (Class C)
Length of Segment: 6.5 miles
County (ies): Miller

Use Attainability Analysis (UAA) Study:

UAA ID #: 1303
Submitter: Olsson Associates
Date(s) Conducted: August 26, 2008
Date Received: October 14, 2008
Use Evaluated: Whole Body Contact Recreation (WBCR)

UAA Criteria Evaluated:

- ☐ 1-Natural Pollutant Sources.
☒ 2-Natural, Ephemeral, Intermittent or Low-Flow Condition.
☐ 3-Non-Remedial, Human Caused Condition.
☐ 4-Hydrologic Modifications.
☐ 5-Natural Physical Features.
☐ 6-Substantial, Widespread Social and Economic Impact.

Use Determination & Recommendation:

Has the use existed since November 28, 1975? ☒ Yes ☐ No ☐ Unknown
Comments: The UAA survey was conducted in August 2008 no WBCR was observed. A rope swing and an inner tube were observed. A phone interview cited fish collecting on this stream.

Is the evaluated use attainable? ☒ Yes ☐ No
Comments: The stream met the maximum depth criterion at 1 of 4 sites. A pool meeting the maximum depth criterion was also noted as being near site 2. Because the stream met the maximum depth criterion and there is evidence of existing use, the committee recommends that the WBCR use designation be retained. Due to an interview citing secondary contact recreation (SCR), the committee recommends that the SCR use be assigned.

Committee Recommendation: ☐ Add Use ☒ Retain Use ☐ Remove Use
☐ Modify Use ☐ Inconclusive
